

# Aldosterone regulated genes

**Supplemental Figure 4.** Activation of Aldosterone-regulated genes after unilateral ureteral obstruction (UUO). Bulk kidney RNA-seq values for log<sup>2</sup> TPM(UUO/Sham) were plotted for select aldosterone-regulated genes at 3, 6, and 12 hours after UUO. *Sgk1* (blue), *Scnn1a* (red), *Tsc22d3* (grey), *Tnfrsf12a* (yellow), *Usp2* (green).
